

FileRepository::loadMasoFile

FileRepository::pickFile
Manually

ServiceLocator::register
MasoFile

```
graph LR; A[FileRepository::loadMasoFile] --> C[ServiceLocator::register MasoFile]; B[FileRepository::pickFile Manually] --> C;
```

The diagram illustrates a dependency or flow where two methods from the FileRepository class interact with a method from the ServiceLocator class. The FileRepository methods, 'loadMasoFile' and 'pickFile Manually', are shown in white boxes on the left. The ServiceLocator method, 'register MasoFile', is shown in a grey box on the right. Two blue arrows point from each FileRepository method to the ServiceLocator method, indicating that both FileRepository methods rely on or call the ServiceLocator's register method.
